Scientific Rationale

The 6th International Conference on New Therapies for Parkinson and Dementias (IPAD 6) will take place in Florence on January, 11 2019. The conference will bring together international experts of neurodegenerative diseases coming from the academic world, hospital centres and pharmaceutical industry. The meeting will focus on the new possibilities of preclinical and early diagnosis, and on the more innovative pharmacological and non-pharmacological therapies. The results of clinical trials will be evaluated and discussed, as well as ongoing studies and the expected outcomes, drugs' pipeline, non-pharmacological therapies, perspectives on biomarkers and on future diagnostic-therapeutic scenario and unmet needs of patients with parkinsonian syndromes and dementias
